

PRIMEDIAGNOSTICS

GASTROINTESTINAL PATHOGEN DIAGNOSTICS

Powering Informed Patient Health Decision Making

Bacterial infections of the human gastrointestinal (GI) tract can easily become severe and life-threatening if not treated with the right medication. Such pathogens enter the GI tract through contaminated food or water, including *Vibrio Cholerae* and norovirus, which are highly infectious and deadly when not treated promptly.

Our Gastro-PDx test detects the most common gastrointestinal pathogens within a patient fecal specimen with a single rapid test, allowing you to prescribe patients the right treatment on time.

GASTROINTESTINAL PATHOGEN

DIAGNOSTICS TEST MENU

Bacterial Gastroenteritis

- Campylobacter sp. (Jejuni)
- Clostridium difficile
- Enteroaggregative E. coli (EAEC)
- Enteroinvasive E. coli (EIEC)
- Enteropathogenic E. coli (EPEC)
- Enterotoxigenic E. coli (ETEC)
- Plesiomonas shigelloides
- Salmonella spp.
- Shigella spp.
- Vibrio cholerae
- Yersinia enterocolitica

Stool Parasites

- Cryptosporidium spp.
- Dientamoeba fragilis
- Entamoeba histolytica
- Giardia lamblia

Viral Targets

- Norovirus G1, G2
- Adenovirus
- Astrovirus
- Rotavirus
- Sapovirus
